Task Question: (CLO1, P4)

1. Construct the HTML, CSS, JavaScript and jQuery in developing an interactive web page that can be published on web browser which has the following characteristics:

    i.   Apply jQuery framework for the website that has a Layout as shown in the Diagrams on the next page. Provide 3 pages which are: About Us, Portfolio and Contact us. You can use the same content, but some parts must be changed according to the names, images and contact details of your group members. Apply the mobile Webapps architecture: roles; theming and page.

    ii. Apply appropriate buttons and links for all menus so they can be linked to the correct pages.

    iii. Write codes to enable the web app to directly make a call send email and WhatsApp.

    iv. Write '*Copyright © DDT4 S1 2023/2024. All rights reserved*' at footer area and centre alignment.

    v.   Manipulate dialogs according to the needs of the pages and your creativity.

    vi. Apply resources' hosting:

        a. Host all the files within our project for Webapps application.

   b. Use a Content Delivery Network (CDN) for Webapps application.

    Note:

    i.   Select the appropriate web hosting package and connect the FTP software to the web hosting. Eg: https://www.000webhost.com/, https://www.infinityfree.net/, https://pages.github.com/, etc.

    ii. Make sure all screenshots provided are in **responsive** view format.
